QUALITY AND SUSTAINABILITY STATEMENT

Botanical Innovations has adopted a sustainable ethos throughout the company's supply, manufacturing and distribution chains.

The company is committed to global climate change agreements.

Botanical Innovations sources only natural products that are produced in accordance with sustainable agricultural practices.

Our processing methodologies are developed along the lines of green chemistry practises including sourcing renewable feedstocks and understanding the full lifecycle of our products.

Botanical Innovations is HACCP and GMP Accredited.

HACCP The Hazard Analysis Critical Control Point system, which provides a systematic approach to safety management and GMP Good Manufacturing Practices

BUDDHA WOOD ESSENTIAL OIL **AUSTRALIAN DESERT ROSEWOOD ESSENTIAL OIL** **AUSTRALIAN SANDALWOOD, EREMOPHILLA MITCHELLI**

An ancient wood steeped in history and traditions of love, ceremony and sacred initiations dating back 40,000 years. The aroma from the wood has been treasured and utilised by men under the custodianship of women for centuries. The Buddha Wood Essential Oil aroma has a long unbroken history being part of boys journey to manhood and independence combined with sensuality and love in the remote desert regions of Australia's heartlands.

The timeless nature of this pure aroma is as prized as Sandalwood and Agarwood Oud Oils which have been steeped in history and sensuality for generations.

The species was formally identified and classified in 1849 by botanist George Bentham. By the 1920s the essential oil from the Eremophilla Mitchellii essential oil was being exported to China for perfumes. The industry remained a boutique oil until now as the oil and its benefits are being rediscovered.

Applications are perfumery, aromatherapy and the formulation of therapeutic goods.

It is recommended for external use only.

The potential benefits of Buddha Wood Essential Oil are:

- Aroma
- Psychological health
- Wound care
- Respiratory health
- Relief of Joint Pain
- Antibacterial
- Anti oxidant

DATA SHEET PRODUCT

AUSTRALIAN BUDDHA WOOD DESERT ROSEWOOD SANDALWOOD ESSENTIAL OIL

Differentiate your product range and product aroma and profile with this uniquely Australian Essential Oil.

INGREDIENTS

Product Name: Australian Buddha Wood, Desert Rosewood, Sandalwood Essential Oil

Botanical Name: *Eremophila Mitchellii*

CAS: N/A

INCI: N/A

Description: Twice Distilled Essential Oil from *Eremophila Mitchellii* heartwood.

CONCENTRATED PHYTONUTRIENTS

This unique essential oil has a unique chemistry giving it a similar structure to Agarwood and Vetiver.

The main constituents of Australian Desert Rosewood Essential Oil are Eremophilone, 2-Hydroxy-Eremophilone and 2-Hydroxy-2-Dihydroxy-Eremophilone.

BOTANY AND HISTORY

Eremophilla Mitchellii is a desert loving tree found throughout the arid regions of tropical and sub tropical Australia primarily found in native scrub ranging from Northern Queensland to Northern NSW. *Eremophilla Mitchellii* grows to between 2.5-6 metres has glossy dark green broomlike leaves and white or mauve bell shaped fragrant flowers.

The tree has a distinctive woody aromatic scent from the oil trapped inside the wood and has been harvested for centuries for a wide variety of uses with commercial processing dating back to last century when the essential oil and timber were exported to China for incense and perfumery. Trade was interrupted during the First World War processing of the timber remained a cottage industry until Botanical Innovations began developing commercial production technology in 2014.

AUSTRALIAN COSMECEUTICAL FRAGRANCES AND INGREDIENTS

Plant Extracts-Naturally Fermented Fruits and Vinegars
Cold Pressed Oils-Essential Oils-Phenolic Rich Powders

BUDDHA WOOD LEAF STEM CELL EXTRACT **EREMOPHILLA MITCHELLI LEAF STEM CELL EXTRACT**

Australia is a country both floods, bush fires and severe droughts. The native flora has over millennia created unique means of surviving during periods of adversity with many trees hibernating during floods and drought to be awakened after fire sweeps through. The charred trees regenerate creating unique stem cells born out of adversity.

The Eremophilla Mitchellii (Buddha Wood) Leaf Stem Cell extract is created from the cells from the plant renewal after fire. The cells in the extract have been created from new growth stem cells which have undergone an aging process and are new cells that have the potential to grow new limbs, leaves and flowers allowing the tree to live for centuries.

Eremophilla Mitchellii Leaf Stem Cell Extract is a unique ingredient for cosmetic applications for wrinkle, anti ageing, moisturising and hydrating products. The Eremophilla Mitchellii Leaf Stem Cell Extract is water soluble and extracted using Botanical Innovations Patented Technology.

EREMOPHILLA MITCHELLI BUDDHA WOOD LEAF STEM CELL EXTRACT

Differentiate your product range, aroma and phytonutrient activity with Eremophilla Mitchellii (Buddha Wood) Leaf Stem Cell Extract

INGREDIENTS

Product Name: Eremophilla Mitchellii (Buddha Wood) Leaf Stem Cell Extract

Botanical Name: *Eremophila Mitchellii*

CAS: N/A

INCI: N/A

Description: Eremophilla Mitchellii stem cell leaf extract

CONCENTRATED PHYTONUTRIENTS

This unique stem cell extract is created from the new stems cells created by the Eremophilla Mitchellii after the a bush fire.

The main constituents of Eremophilla Mitchellii Leaf stem cell are Eremophilone, 2-Hydroxy-Eremophilone and 2-Hydroxy-2-Dihydroxy-Eremophilone.

UNIQUE STEM CELL HARVEST

Eremophilla Mitchellii is a desert loving tree found throughout the arid regions of tropical and sub tropical Australia primarily found in native scrub ranging from Northern Queensland to Northern NSW. Eremophilla Mitchellii grows to between 2.5-6 metres has glossy dark green broomlike leaves and white or mauve bell shaped fragrant flowers.

The trees live for hundreds of years through droughts, floods and often remain dormant for long periods. The Eremophilla Mitchellii will during its lifetime experience bushfires ranging in temperature from 300 -800 Degrees Celcius. Following this intense heat the tree comes back to life generating leaves, flowers and branches. It is the new growth leaves that are harvested to create this unique stem cell extract.

AUSTRALIAN COSMECEUTICAL FRAGRANCES AND INGREDIENTS

Plant Extracts-Naturally Fermented Fruits and Vinegars
Cold Pressed Oils-Essential Oils-Phenolic Rich Powders

QUANDONG SEED OIL, DESERT PEACH, EMU BUSH SATALUM ACUMINATUM, DESERT SANDALWOOD

The Quandong *Salatum Acumintum* is an Australian sandalwood tree with a unique seed which contains approximately 50% oil and 50% protein.

The Quandong tree is found throughout the Central Desert and Southern Australia.

The Quandong seed has been used for its oil and protein for thousands of years. The oil is a natural medicine with skin and wound healing properties. The name Quandong comes from the Wiradjuri People of Central NSW where it is known as Guwandhang or Emu Bush.

Quandong trees are steeped in mystery and tradition as they are an integral part of the desert ecosystem feeding emus, butterflies and the *paraeoermeria* moths. The fallen seeds are maps to ancient waterways and have been used to find and manage water reserves in arid outback Australia for 40,000 years.

Quandong seed oil has a unique fatty acid profile. It has the highest Xymenic Acid content of the seeds within the sandalwood family. Quandong seed oil contains approximately 50% Xymenic Acid which is an established anti-inflammatory lipid. The oil also contains approximately 50% Oleic acid with emollient and nourishing properties making it a natural restorative, anti-ageing oil suitable for a variety of applications.

The oil is a clear fine liquid which when blended in formulations or with carrier oils at 5 to 8% will add truly unique phytochemical properties to any formulation.

BOTANICAL INNOVATIONS

Botanical Innovations is an Australian Bio Technology company adding value to naturally occurring elements to create functional food and beverage solutions, which combine taste and function.

The company invests heavily in research and development leading to innovations, new products and proprietary production methodologies and the development of a unique range of **AUSTRALIAN FUNCTIONAL NUTRACEUTICAL, Flavours, Frances & Ingredients for Functional Foods & Beverages, Natural Healthcare and Cosmeceutical Applications.**

The Botanical Innovations product range includes, Plant Extracts, Fermented Plant Extracts, Cold Pressed Seed Oils, Fermented Fruit & Vinegar, Fruit Powders & Essential Oils.

By unlocking natures secrets Botanical Innovations has created new classes of flavours, fragrances and ingredients that contain phenolic rich phyto nutrients the natural chemical compounds produced by plants from photosynthesis.

Our database of scientific literature provides our customers with access to the latest research and applications for our unique range of products.

Botanical Innovations products include:

Plant Extracts and Fermented Plant Extract

Grape Seed Extracts
Grape Skin Extracts
Apple Peel Extracts
French Oak Extracts
