BUDDHA WOOD ESSENTIAL OIL DATA SHEET

Botanical Name: *Eremophilla Mitchellii*

Description: Eremophilla Mitchellii Buddha Wood Essential Oil

Common Names: Buddha Wood Oil, Australian Sandalwood Oil, Desert Rosewood Oil

Production: Essential Oil Extraction from Heartwood

Aromatic Oil: Woody sensual, hint vanilla

Applications: Perfumery, Fragrance, Topical Nutraceutical, Cosmeceutical and Health and Wellness products.

This unique essential oil has a unique chemistry giving it a similar structure to Agarwood and Vetiver.

The main constituents of Eremophilla Mitchellii Essential Oil are the unique **phytonutrients unique to the Eremophilla Eremophilone, 2-Hydroxy-Eremophilone and 2-Hydroxy-2-Dihydroxy-Eremophilone.**

Buddha Wood Oil has been used for spiritual, medicinal and healing purposes for over 40,000 years. The Chinese during early 20th Century imported the oil for its aromatic and medicinal properties.

Botanical Innovations has a joint venture partnership with farmers in Northern NSW to sustainably wild harvest Eremophilla Mitchellii subject to permits and licences from the Australian Government.

Botanical Innovations is committed to sustainable harvesting. Eremophilla Mitchellii is sustainably harvested. Botanical Innovations ensures during harvesting there is no ecological damage to other species, the area maintains its biodiversity, climate and water cycles. The amount of wood taken is managed to ensure no disruption to the natural production and the natural ecosystem is in balance maintaining its biodiversity climate and water cycles.

Minimum order quantities apply.
